

## PRESS RELEASE

Paris, 27 February 2019

# **E.ON joins ENGIE and EDPR in their Dunkerque Eoliennes en Mer consortium**

**In the framework of the competitive bidding process for offshore wind turbines off the coast of Dunkerque, ENGIE and EDPR announce the addition of E.ON to the Dunkerque Eoliennes en Mer consortium. With the arrival of E.ON, the consortium now brings together 3 European champions of renewable energies, enriching the industrial excellence of its offer.**

Together, ENGIE, EDPR and E.ON want to make the project a strong symbol of Dunkerque's energy transition, developed with all the region's players. The consortium has been forging close ties with all local stakeholders for almost two years to make this project a real example of integration and support of energy transition at the regional level.

ENGIE, EDPR and E.ON place energy transition at the heart of their strategies: between them, they operate more than 49,000 MW of renewable electricity generation capacity worldwide. With 20 years' combined experience in offshore wind, the members of the Dunkerque Eoliennes en Mer consortium are committed to the operation or development of 19 offshore wind projects with a capacity of more than 5,600 MW.

"E.ON is pleased to bring the Dunkerque Eoliennes en Mer consortium nearly 20 years of experience in offshore wind in 4 European countries. Our international experience in this field is an asset for this major project," said Sven Utermöhlen, Chief Operating Officer E.ON Climate and Renewables.

"We are looking forward to welcoming E.ON to Dunkerque Eoliennes en Mer. We are working closely with all local players, with whom ENGIE has maintained trusting relationships over several decades," said Gwénaëlle Huet, CEO of ENGIE France Renewables.

"E.ON's arrival in the Dunkerque Eoliennes en Mer consortium reinforces the technical excellence of our project. Together, EDPR, ENGIE and E.ON bring the best of European offshore wind to the Dunkerque project," added Spyridon Martinis, Chief Development Officer & Chief Operating Officer Offshore of EDP Renewables.

## About E.ON

E.ON is an international private energy company, which focuses on energy networks, customer solutions, and renewable energies. As one of Europe's largest energy companies, E.ON plays a leading role in shaping a clean, digital, decentralized world of energy. To this end, the company develops and sells products and solutions for private, commercial and industrial customers. In fiscal 2017, 43,000 employees generated sales of €38bn. Around 32 million customers purchase electricity, gas, digital products or solutions for electric mobility and energy efficiency from E.ON. The company is one of the world's leading producers of renewable energy and has invested more than €12 bn in this business area in recent years and has successfully installed more than 7,000 MW of renewable energy in 7 countries in Europe and North America. With eight offshore wind farms, including one of the largest in the world, London Array (in the UK, with a capacity of 630 MW), Eon has extensive knowledge and experience in wind farm operations. In 2018, Eon commissioned the offshore wind farms of Rampion in the British Channel and Arkona in the Baltic Sea for nearly 800 MW. E.ON is headquartered in Essen, Germany. ## About ENGIE

We are a global energy and services group, focused on three core activities: low-carbon power generation mainly based on natural gas and renewable energy, global networks and customer solutions. Driven by our ambition to contribute to harmonious progress, we address major global challenges such as the fight against global warming, access to energy for all and mobility, and offer our residential customers, businesses and communities' energy production solutions and services that reconcile individual and collective interests. Our integrated – low-carbon, high-performing and sustainable – offers are based on digital technologies. Beyond energy, they facilitate the development of new uses and promote new ways of living and working. Our ambition is conveyed by each of our 150,000 employees in 70 countries. Together with our customers and partners, they form a community of imaginative builders who invent and build today solutions for tomorrow. 2017 turnover: €65 bn. Listed in Paris and Brussels (ENGI), the Group is represented on the main financial (CAC 40, BEL 20, Euro STOXX 50, STOXX Europe 600, MSCI Europe, Euronext 100, FTSE Eurotop 100, Euro STOXX Utilities, STOXX Europe 600 Utilities) and extra-financial indices (DJSI World, DJSI Europe and Euronext Vigeo Eiris - World 120, Eurozone 120, Europe 120, France 20, CAC 40 Governance). ## About EDP Renewables (EDPR)

EDP Renewables (Euronext: EDPR) is a global leader in the renewable energy sector and the world's fourth-largest wind energy producer. With a sound development pipeline, first class assets and market-leading operating capacity, EDPR has undergone exceptional development in recent years and is currently present in 13 international markets (Belgium, Brazil, Canada, France, Greece, Italy, Mexico, Poland, Portugal, Romania, Spain, the UK and the US). EDPR is a major player in renewable energies in France, with 410 MW of installed onshore capacity in operation. EDPR is also a shareholder in offshore wind projects in Dieppe / Le Tréport and Yeu / Noirmoutier. EDPR has a long-term commitment to supporting the French energy transition effort with its expertise and its human and financial resources. Energias de Portugal, S.A. ("EDP"), the principal shareholder of EDPR, is a global energy company and a leader in value creation, innovation and sustainability. EDP has featured on the Dow Jones Sustainability Index for 11 consecutive years. For further information, please visit [www.edpr.com](http://www.edpr.com)
