

PRESS RELEASE

GDF SUEZ

January 22, 2013

GDF SUEZ extends its energy efficiency activity in Malaysia

GDF SUEZ will contribute to the sustainable development of Cyberjaya, Malaysia's premier cybercity, through joint operation with local partner Cyberview Sdn Bhd of Cyberjaya's district cooling network. Through Cofely, a GDF SUEZ company, the Group will bring its international expertise in heating and cooling systems and in energy efficiency to Cyberjaya.

To this end, GDF SUEZ has acquired a 49% share of Pendinginan Megajana Sdn Bhd, a wholly-owned subsidiary of Cyberview Sdn Bhd that owns, operates and manages the district cooling network in Cyberjaya. Cofely and Cyberview will jointly operate and further develop this network.

Megajana is the sole supplier of chilled water and developer of the district cooling system for business premises in Cyberjaya. Two plants are currently supplying chilled water to 37 major buildings providing them 24/7 energy efficient, cost-effective and reliable chilled water through a 15 km network of underground pipes.

The joint venture will cater to this premier ICT hub's rapid expansion, presently growing annually more than 70%. Today, Cyberjaya is home to more than 600 Malaysian and global technology companies including Hewlett Packard, Dell, Fujitsu, Motorola, AMD, DHL, HSBC, Shell, BMW, IBM and Ericsson.

"With the entry of Cofely as a world-leading player, Megajana will improve the quality of service to its customers while enriching its commercial offering through innovative strategies derived from GDF SUEZ expertise. Moreover this joint venture is fully in line with GDF SUEZ strategy to expand its activities in fast growing markets," said Jérôme Tolot, Executive Vice President of GDF SUEZ in charge of the Energy Services business line.

District networks make it possible to optimize energy efficiency while reducing CO₂ emissions and provide for sustainable urban development. In Asia, the Group is developing quickly in this sector. GDF SUEZ has recently signed an agreement with the city of Tianjin in China to build, own and operate over 23 years the district cooling network of the Yujiapu new financial district.

GDF SUEZ, through Cofely, is the leading district cooling and heating network operator in France and in the United Kingdom, and operates over 180 district heating and cooling systems worldwide, including for the cities of Amsterdam, Barcelona, Lisbon, London, Monaco, Paris and now Cyberjaya.

About GDF SUEZ

GDF SUEZ develops its businesses around a model based on responsible growth to take up today's major energy and environmental challenges: meeting energy needs, ensuring the security of supply, combating climate change and optimizing the use of resources. The Group provides highly efficient and innovative solutions to individuals, cities and businesses by relying on diversified gas-supply sources, flexible and low-emission power generation as well as unique expertise in four key sectors: liquefied natural gas, energy efficiency services, independent power production and environmental services. GDF SUEZ employs 218,900 people worldwide and achieved revenues of €90.7 billion in 2011. The Group is listed on the Brussels and Paris stock exchanges and is represented in the main international indices: CAC 40, BEL 20, DJ Stoxx 50, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe, ASPI Eurozone and ECPI Ethical Index EMU.
