

Press release

10 June 2021

## **ENGIE makes a commitment to the European Commission to help consumers reduce their carbon footprint**

**ENGIE has responded to the European Commission's "European Union Green Consumption Pledge Initiative", which aims to encourage companies to make voluntary commitments that facilitate sustainable production and consumption. ENGIE has made several "green commitments" to reduce both its own carbon footprint and its clients' and consumers' footprints.**

In response to global environmental challenges and human impacts on the climate, natural resources and biodiversity, stakeholders at every level – countries, cities, companies and citizens – are all playing their part.

ENGIE is currently the only energy company selected by the European Commission for this pilot phase, along with Décathlon, Lego and L'Oréal. The Group has made the following four commitments:

- To increase the overall share of renewable energy in electricity production (from 31% in 2020 to 58% in 2030), to completely phase out coal-fuelled power in Europe by 2025 and to step up investments in renewable assets (goal: to install an additional 3 GW of capacity in 2021, followed by 4 GW per year from 2022 to 2025 and finally 6 GW per year starting 2026).
- To serve 300,000 Green+<sup>i</sup> clients (with 100% renewable electricity directly from domestic producers, guaranteed by green certificates) by the end of 2024.
- To provide its customers with additional means to help reduce their energy consumption with notably *Mon Programme pour Agir*<sup>ii</sup> (goal: 1.2 million subscribers) which rewards energy savings.
- To report on its progress in achieving these objectives and meeting its integrated report commitments.

ENGIE, the leading wind and solar company in France, advocates for a model based on less energy-intensive consumption and renewable energy. In France, the Group is already

committed to offering its clients an energy mix comprising over 70% of renewable energy, and to providing carbon-free energy supply and consumption control solutions for its individual clients. All its electricity contracts include green electricity: for every KWh of electricity consumed, an equivalent amount of renewable electricity is injected into the network. ENGIE also offers electricity contracts that are 100% hydro and wind-powered, from production sites that are exclusively located in France. This enables ENGIE to commit to a local, eco-friendly approach, in line with the strategy presented by the Group in the first semester of 2021 and with its target of achieving Net Zero Carbon by 2045.

*“Our clients are central to the energy transition. By adapting their energy consumption, they all contribute, in their own way, to fighting global warming. ENGIE’s ambition is to support them throughout this transition, with a personalised approach that provides appropriate solutions to each of their needs.”* said Sébastien Arbola, ENGIE Executive Vice President in charge of Thermal Generation, Hydrogen and Energy Supply.

For more information on ENGIE’s commitments can be found on the European Commission’s website, click [here](#).

## About ENGIE

Our Group is a global reference in low-carbon energy and services. Together with our 170,000 employees, our customers, partners and stakeholders, we are committed to accelerate the transition towards a carbon-neutral world, through reduced energy consumption and more environmentally friendly solutions. Inspired by our purpose (“raison d’être”), we reconcile economic performance with a positive impact on people and the planet, building on our key businesses (gas, renewable energy, services) to offer competitive solutions to our customers.

Turnover in 2020: 55.8 billion Euros. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial indices (CAC 40, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe) and non-financial indices (DJSI World, DJSI Europe, Euronext Vigeo Eiris - Eurozone 120/ Europe 120/ France 20, MSCI EMU ESG, MSCI Europe ESG, Euro Stoxx 50 ESG, Stoxx Europe 600 ESG, and Stoxx Global 1800 ESG).
